OUR Story

THEKGA means to support in Sepedi, an indigenous language to Limpopo, South Africa. Inspired by the beauty of nature, THEKGA Eco-Briquettes are made using Alien Invasive plant fibres, primarily Water Hyacinth, Pine and Black Wattle which threaten our scarce water resources. We make our products using eco-friendly raw materials, recyclable and biodegradable packaging.

OUR PRODUCT

Biomass is the only energy source that has enough carbon reserves to replace coal today. Biomass is classified as carbon neutral due to its renewable nature.

It offers significant environmental benefits. With our briquettes being manufactured from harvested water hyacinth, pine, black wattle and sawmill waste, we can proudly say that our raw product is carbon neutral.

THEKGA ECO LOGS & BIOCHARCOAL BRIQUETTES

Eco Logs are a type of biomass made of compressed recycled waste, suitable for burning in indoor and outdoor spaces.

- 2kg Eco-Briquettes
- 4kg Eco-Briquettes
- 8kg Eco-Briquettes

*Proudly South African
Carbon neutral Product
Non-Toxic Briquette
Clean burning (Eco friendly)
Recycled Materials*

ABOUT ECO-LOGS

Eco-friendly Sustainable Clean handling

- Recycled materials
- Produce less emissions
- 80% less fine particles
- 75% less carbon monoxide
- Turning a wasted product into energy
- Ability to slow down de-forestation
- Renewable source of energy

“Eco logs & Biocharcoal Briquettes are a renewable energy source made from compressed biomass waste, such as agricultural residues, forestry waste, and invasive alien plants. These products offer a cleaner, more efficient, and cost-effective alternative to traditional fuels”

ABOUT BIOCHARCOAL BRIQUETTES

- Sustainable: Made from renewable biomass sources, reducing dependence on fossil fuels and mitigating climate change.
- Long-lasting: Burns for up to 3 times longer than traditional charcoal, reducing fuel consumption and cooking time.
- Consistent heat: Provides a steady, high heat output for perfect grilling and cooking.
- Less smoke: Produce significantly less smoke and particulate matter, making your BBQ experience more enjoyable.
- Improved flavour: Our Biocharcoal briquettes are made from natural materials, ensuring a pure, smoky flavour without additives or chemicals.
